Paulo Chaves da Silva Filho

Senior Software Engineer

opchaves.com paulo@opchaves.com Github LinkedIn

Summary

Senior Software Engineer with 10+ years of experience. Currently architecting AI-driven platforms at Thunkable to enable natural language app generation. Main stack is Node.js, React, and Ruby on Rails with an AI-augmented development using Claude Code.

Skills

- **AI & LLM:** Claude Code, ChatGPT, Codex, Prompt Engineering, AI-Augmented Development
- **Backend:** Node.js, TypeScript, Ruby on Rails, PostgreSQL, MongoDB, Redis, REST, GraphQL
- **Frontend:** React.js, React Router, Next.js, Vite, Tailwind CSS, TypeScript, UI/UX
- **Infrastructure & Ops:** Docker, Kubernetes, GCP, CI/CD (GitHub Actions), Git
- **Testing:** Playwright, Cypress, Jest, Vitest, Truffle

Experience

Senior Software Engineer at Thunkable

April 2023 to Current

- Architect and develop AI-driven features using LLMs (Claude, ChatGPT) to transition the platform to a natural language interface.
- Maintain scalable Node.js backends with REST/GraphQL, integrating Google Sheets, Airtable, and Baserow for dynamic apps.
- Optimize infrastructure using Docker and Kubernetes to enable cross-platform app generation (React Native, Expo).
- Lead end-to-end feature development across database, backend, frontend (React, TypeScript), and mobile components.
- Improve operational efficiency by optimizing MongoDB performance and backend processes.
- Ensure reliability through comprehensive end-to-end testing with Playwright.
- **Technologies:** Node.js, TypeScript, React, GraphQL, LLMs, Docker, Kubernetes, MongoDB, Redis.

Software Engineer at BairesDev

July 2020 to December 2022

Consulting for North American tech companies.

Blazer (formerly Brooks Bell) — Frontend Developer

- Architected 50+ high-traffic A/B tests using Vanilla JS and jQuery via Adobe Target, optimizing UI/UX without direct source access.
- Eliminated "content flicker" by optimizing script execution for sub-second delivery on production sites.

Instructure — Software Engineer

- Enhanced core Canvas LMS components using Ruby on Rails, React, and TypeScript.
- Developed RESTful APIs and complex data models, contributing to the full feature lifecycle for millions of users.
- Built accessible (WCAG) and internationalized (i18n) web experiences for a global audience.

- **Technologies:** Ruby on Rails, React, TypeScript, PostgreSQL, AWS, Docker.

Senior Fullstack Developer (Remote) at Movinga

August 2019 to March 2020

- Developed scalable UIs with Next.js and React, migrating the site to a headless CMS (Gatsby).
- Built Node.js/Rails backends and integrated Salesforce APIs while establishing engineering best practices.
- **Technologies:** Node.js, React, Gatsby, Rails, Postgres, Redis.

Blockchain Engineer (Remote) at Lucidity Tech

February 2018 to April 2019

- Developed high-throughput event processing pipelines using Ethereum, Smart Contracts, and Node.js/Ruby APIs.
- Built React.js frontends and wrote automated tests for Solidity contracts using Truffle.
- **Technologies:** Node.js, Ruby, Ethereum, Solidity, React, Truffle.

Software Engineer at Codeminer42

January 2018 to April 2019

- Collaborated with international customers to deliver scalable solutions using JavaScript and Ruby.
- Acted as a consultant for Lucidity Tech, specializing in blockchain and full-stack development.
- **Technologies:** JavaScript, Ruby, Ruby on Rails, REST APIs.

Software Developer at SEFAZ-PI

September 2016 to April 2017

- Developed high-performance batch jobs using Python to parse millions of records from Oracle to MongoDB.
- Managed MongoDB replica sets for data persistence and operational efficiency.
- **Technologies:** Python, Oracle, MongoDB, Shell Scripting.

Full-Stack Developer at Tartigrado Tecnologia

January 2016 to June 2016

- Modernized legacy Java/Struts2 applications by integrating Spring Framework, AngularJS, and REST APIs.
- **Technologies:** Java, Spring, Hibernate, Angular.js, REST.

Full-Stack Developer at Supra Tecnologia

January 2010 to December 2012

- Developed a PHP-based scheduling system for 1M+ users and led the migration from MySQL to PostgreSQL with Git adoption.
- **Technologies:** PHP, PostgreSQL, JavaScript, Git.

Education

- Computer Science, Loyola University Chicago – 2014 - 2015
- Systems Analysis and Development, Federal Institute of Technology in Piaui – 2013 - 2019
