Summary

Senior Developer with over 10 years of experience, specializing in backend development with Node.js, developing REST and GraphQL APIs. Skilled in the development of dynamic and modern UIs to enable efficient, scalable, and maintainable solutions in web applications using React.js and TypeScript.

Skills

- **Backend:** Node.js, TypeScript, PostgreSQL, REST, GraphQL, MongoDB, Docker
- **Frontend:** React, React Router, Redux, Tailwind CSS, AntD, UI/UX, SSR, SPA

Experience

Senior Fullstack Developer (Remote | Contractor) at Thunkable
April 2023 to Current

- Design and maintain scalable Node.js APIs using Express, GraphQL, and REST, integrated with MongoDB and Redis.
- Integrate third-party tools (e.g., Airtable, Firebase) into backend infrastructure.
- Develop React.js-based frontend interfaces with AntD and Redux.
- Collaborate with QA to author Cypress E2E tests.

Software Engineer at BairesDev
July 2020 to December 2022

- Enhanced Canvas LMS components (e.g., Gradebook) at Instructure using Rails and React.js.
- Supported A/B testing at BrooksBell with JavaScript and Adobe Target.

Software Engineer at Movinga
August 2019 to March 2020

- Migrated Rails backend to Node.js with Express for improved scalability.
- Built UIs with Next.js and Material-UI.

Education

- Computer Science, Loyola University Chicago – 2014 - 2015
- Systems Analysis and Development, Federal Institute of Technology in Piaui – 2013 - 2019
